Art Unit: 1714

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 34 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The recited weight average molecular weight is NEW MATTER since applicant failed to provide a particular support.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 15-30 and 33-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Auguste et al (US 6,051,748 or WO 98/10801) in view of Chen (US 5,633,010).

Reaction is maintained for reason of record and following response.

Whether the low molecular weight polyisobutylene resin is used as a tackifier or not in the instant invention is immaterial since the tackifying property of said low

Art Unit: 1714

molecular weight polyisobutylene resin is an inherent property. Also, a composition comprising a poly(styrene/isoprene/styrene) copolymer, a low molecular weight polyisobutylene resin, an acrylate copolymer having Tg of less than  $-20^{\circ}\text{C}$ , a plasticizer, a hydrocolloid and at least one antioxidant without other tackifier resin meets the instant invention, and said low molecular weight polyisobutylene resin would act as a tackifier.

The issue is whether the use of the low molecular weight polyisobutylene resin of Chen in Auguste et al as a tackifier is obvious or not without applicant's disclosure, and the examiner believes it is obvious since Chen recites the same tackifier such as WINGTACK 86 at col. 5, line 3 taught by Auguste et al (col. 3, line 34). The poly(styrene/isoprene/styrene) copolymer taught by Auguste et al is a hydrophobic and thus the of the low molecular weight polyisobutylene resin of Chen in Auguste et al is a *prima facie* obviousness contrary to applicant's assertion.

Claims 15-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Auguste et al (US 6,051,748 or WO 98/10801) in view of Chen (US 5,633,010), and further in view of Kubo et al (US 6,146,654).

Reaction is maintained for reason of record and above.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
